# Reduce the impact of the sun on your windows

Choose our innovative Matte Black cool color & extend your products surface life

## Temperature Control

Our innovative Cool Color Technology keeps your window profile temperature under control. Constructed with a three layer system, each layer significantly makes a difference in the durability of the window frame. The laminate is equipped with a transparent high grade weather resistant PMMA (Polymethyl methacrylate) overlay, a pigmented vinyl center layer, and a highly full IR reflective vinyl bottom layer laminate. All three layers produce a thickness that is 9-10 mils. that help extend your products life.

# A uniform & elegant look to all your projects

Seamlessly match your windows and doors to create a lasting visual impact.

# Our Timeless and Elegance Series doors are now available in our Matte Black.
